

Lúcia M. R. Guelber

Frontend Web Developer

I am a web developer focused on frontend, I also have knowledge in backend. I love technology and study continuously, always looking to learn what's new, strongly active on GitHub, I make daily contributions as a form of registration, which already add up to more than 1 year and a half of a lot of dedication. I have a degree in Arts and Design from UFJF and I have a degree in Cinema and Audiovisual from the same institution.

Skills

Advanced

HTML, CSS, Javascript, React, Next.js, SASS, Git e GitHub, Typescript, Tailwindcss, Express.

Basic

Node, NPM and Yarn, JQuery, Bootstrap, Angular, Vue.js, Batch Script, Python, UI/UX Design.

Learning

MongoDB, MySQL, Postgres.

Education

Curso Web Moderno Completo – Udemy

2021-2023

In this course, I learned about Javascript, Web Concepts, HTML and CSS, Ajax, Webpack, jQuery, Bootstrap, React, VueJs, Electron, Angular 9, Database (relational and NoSQL) and Express.

Bacharelado em Cinema e Audiovisual – UFJF

2022-2024

As a Cinema and Audiovisual student, I have knowledge about screenwriting, montage and editing (of videos/films), film theory, among others. I have already produced some audiovisual content and films.

Bacharelado Interdisciplinar em Artes e Design – UFJF

2019-2022

Graduated in Arts and Design from UFJF, I had contact with the areas of Design, Cinema and Audiovisual, Fashion, and Visual Arts. During this period, I absorbed content related to the arts and their reverberations.

Projects/Experiences

(+2 years of experience)

ToDo

2022

ToDo is a web application that seeks to store items defined by the user in the browser, mark them as completed or even remove them. React, Next.js, LocalStorage, Typescript and SASS were used.

access: [todo-lucilua.vercel.app](https://github.com/lucilua/todo) repository: github.com/lucilua/todo

HUG

2023

This is a project I did as a team in 24 hours during a Hackathon. I was responsible for writing the code, transforming the prototype into something visual. React and Next.js were used. Code versioning with Git was first used with people other than myself.

access: hug-hackathon.vercel.app **repository:** **private repo**

SOMUUH

2023

Somuuh is a social network project focused on working with authentication and design. Exploring references such as Instagram, Twitter and Spotify.

access: somuuh.vercel.app **repository:** github.com/lucilua/somuuh

CLI: Requests

2023

This is a project written in Python very similar to the already existing postman, but completely through the command line. It sends GET and POST requests, in addition to bringing, when requested through parameters, other information such as header, content returned by the API and response status

repository: github.com/lucilua/python_studies_1/tree/master/requestsCli

Podcastr

2021

During the fifth edition of Next Level Week, an event created by Rocketseat, this application was developed from scratch, using the react.js framework. The application is a website for listening to podcast.

access: podcastr-lucilua.vercel.app
repository: github.com/LuciLua/NLW5-Podcastr

Hidrofobia

2023

Website for the short film Hidrofobia, in which I directed and produced.

Technologies used: React, Next.js and tailwindcss.

access: curtahidrofobia.com **repository:** **private repo**
